

# Club Notes: Peridot AUGUST 2022

Greetings, Quilters!

A Word (or two) about SA (short arm) patterns:

SA patterns are not just for those who have only 10-13" of quilting space on their frames. I routinely choose e2e patterns with a default height of 10" because they give me options.

—I can run two passes of 10" height before I have to advance the quilt.

—If my customer loves a design but wants it to be less dense, I can use the SA version and make it larger to accommodate that lighter density.

—If I'm quilting a king size quilt and the pattern I want has a 18" default size, I will choose to use a SA version to insure that I won't be pulling my hair out when I can't quilt that last pass.

*SA patterns are your friends! If you want a SDQS e2e pattern made in a SA version, send me an email!*

I started quilting about 36 years ago. In 1998 I bought my Statler Stitcher and Sweet Dreams Quilt Studio was born. In 2010 or 2011 JoAnn Blade and I decided to become partners and make beautiful applique quilts on our Statler Stitchers. We were so honored to be asked to take an old applique quilt and turn it into a modern quilt for Mary Kerr's Twisted Book. Dahlias in the Snow was the result. When I heard that the Quilt Museum wanted it for their permanent collection, I was beyond honored. I have been going to the Paducah Quilt Show and visiting the quilt museum for many years. I always looked at all those beautiful quilts and secretly dreamed that one day I'd have a quilt hanging in the museum. I can't believe it really happened. Thanks JoAnn Blade and Mary Wilson Kerr. - Kim Diamond

July is ending and before you know it, we'll all be getting those Christmas quilt gift quilts coming into our studios. I came back from vacation to a studio full of quilt camp quilts and QOV quilts.

Enjoy the patterns!

# Friend Star Patterns

Take note that “friend star border 001” and “friend star brd crn 001” were designed specifically for this quilt. The top and side borders in this quilt were not the same height, so these patterns won’t work in a typical border application (where the borders are the same height).

# ***The Name Panos...sigh!***

—I do my level best to talk my quilting customers OUT of stitching name panos on their quilts. Why? Because I think they almost always detract from the quilt itself AND you can't read the names from the back-side of the quilt. My personal quilting philosophy is to "do no harm" which means not quilting elaborate designs on a quilt just because I have a computer guided longarm which allows me to do so. Just because you CAN does not mean you SHOULD.

—Regardless, name panos are popular, especially around Christmas and Graduation seasons. Consequently, this archive contains more name panos than I would like. Most of them you will never have a use for, so just cull them out and forget about them. That's what I do...they don't make it onto my Statlers. If you need one, you can always ask me to send it to you again.

***—Almost every single name pano started out life as a "normal" pattern, to which we were requested to add a name. The original "normal" pattern is probably NOT included in the current archive, as it was created at some time in the past. That's one reason why CJC members get a 20% discount on all online pattern purchases.***

—From time to time we poll our Crown Jewels Club members and ask them if they'd like us to delete all those name panos from the archive. As Crown Jewels Club members, you pay the \$50.00 monthly fee and get EVERYTHING Kim draws....including the name panos, and apparently, you want them all. Very few people (much to my surprise) voted to have them culled out prior to release.

## **Statler Owners Upgrading to Creative Studio 7.3 and 7.5 (please read)**

Plan your software upgrade! If you have quilts to run and cannot afford any downtime, wait until your quilt load eases up before uploading.

Some people have had better luck downloading the software to a usb stick and upgrading their Statler and their Stand Alone Mode computers from the usb stick, rather than opening the Creative Studio software and then letting it upgrade from that point.

If you upgrade to Creative Studio 7.3 and your controller and/or red key numbers are no longer registered, you'll need to register them again. If the system won't let you register them, you'll need to reach out to Gammill/Statler Technical Support. As much as we'd love to help you, this is not something we can take care of for you. :(

## **ProStitcher Owners (please read)**

DO NOT use the ProStitcher Beta software! Make sure you are running the vs ending 5706. Life will be much easier for you if you're running the current software.
