General Instructions for Advent Calendars

In the Nativity calendar pictured we used 1 layer of felt for the pockets and didn't put the grid quilting on them. We used a layer of muslin, cotton batting, and a single layer of felt for the calendar background.

For the Santa calendar pictured we used 2 layers of felt for the pockets with the grid quilting. We used 2 layers of felt for the background (no batting).

Stitch out the pockets first. Load 1 or 2 layers of fabric. Here we used one extra-large piece of fabric and just let it stitch (more wasteful).

Here we cut out 4 inch squares and just put them in place for each pocket.

Stitch. Follow the stitch map for the order things stitch.

For the applique, put the fabric in place (use your crosshairs to make sure you have enough fabric and that it is in the right location).

When you are done you will trim away the excess fabric from the numbers.

Load your fabric for the calendar. You will need to put both pass 1 and pass 2 on the CAD screen at the same time. Set your stitch length to 15 or 16 spi.

Mark pass2 as sewn. Following the stitch map stitch out the first pass. When done advance quilt. Use relocate all to 2 points and use the end points of the outside border to relocate. You may need to adjust the second pass slightly to make the first. It may need to be slightly smaller to account for shrinkage.

Continue following the stitch map and finish the quilt.

Have fun. Merry Christmas.
