

## Ex. 6: Using p2p line

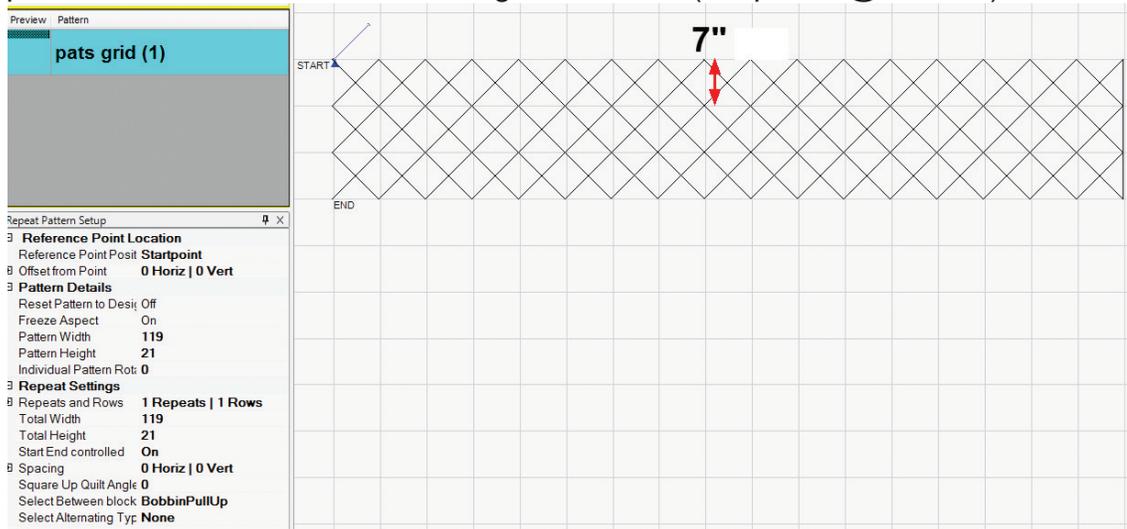

# Exercise 6: Using P2P line to connect E2E Crosshatching

Exercise Author: Pat Roche, Pat's Just Quilting, 4/6/2011©

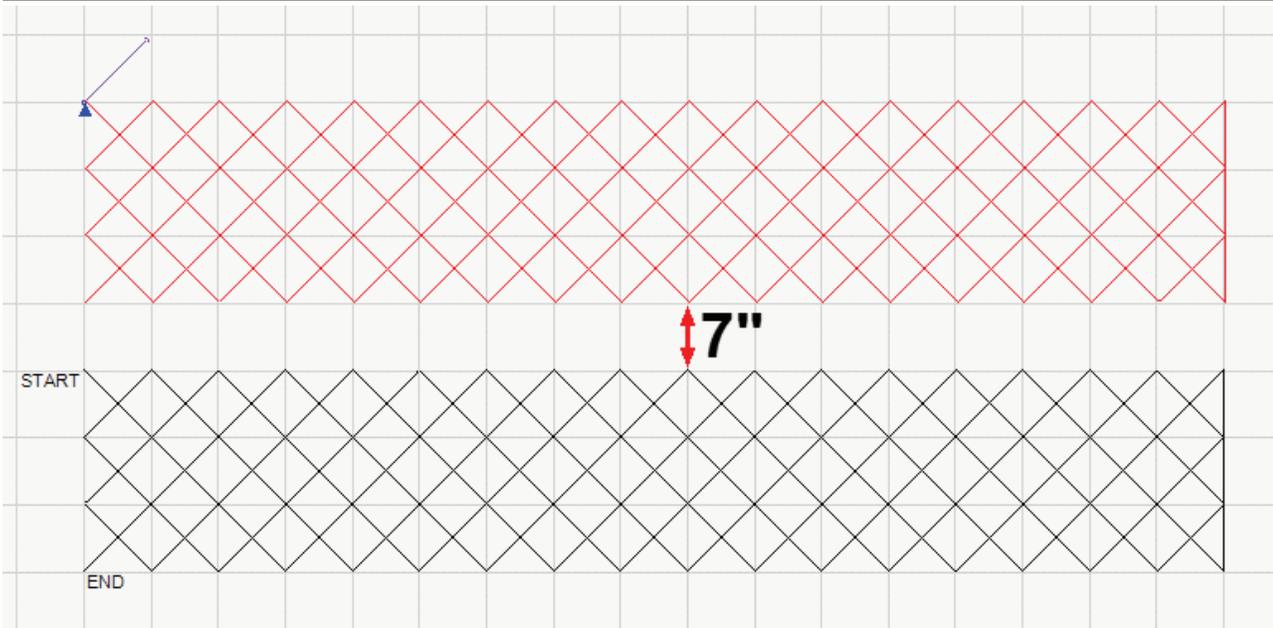

- Load a practice piece on your machine.
- Open Creative Studio.
- Add Pattern: *pats grid*
- Measure dimensions of your quilt. For this exercise: 119" wide x 140" long

We will be using Repeat Pattern mode.

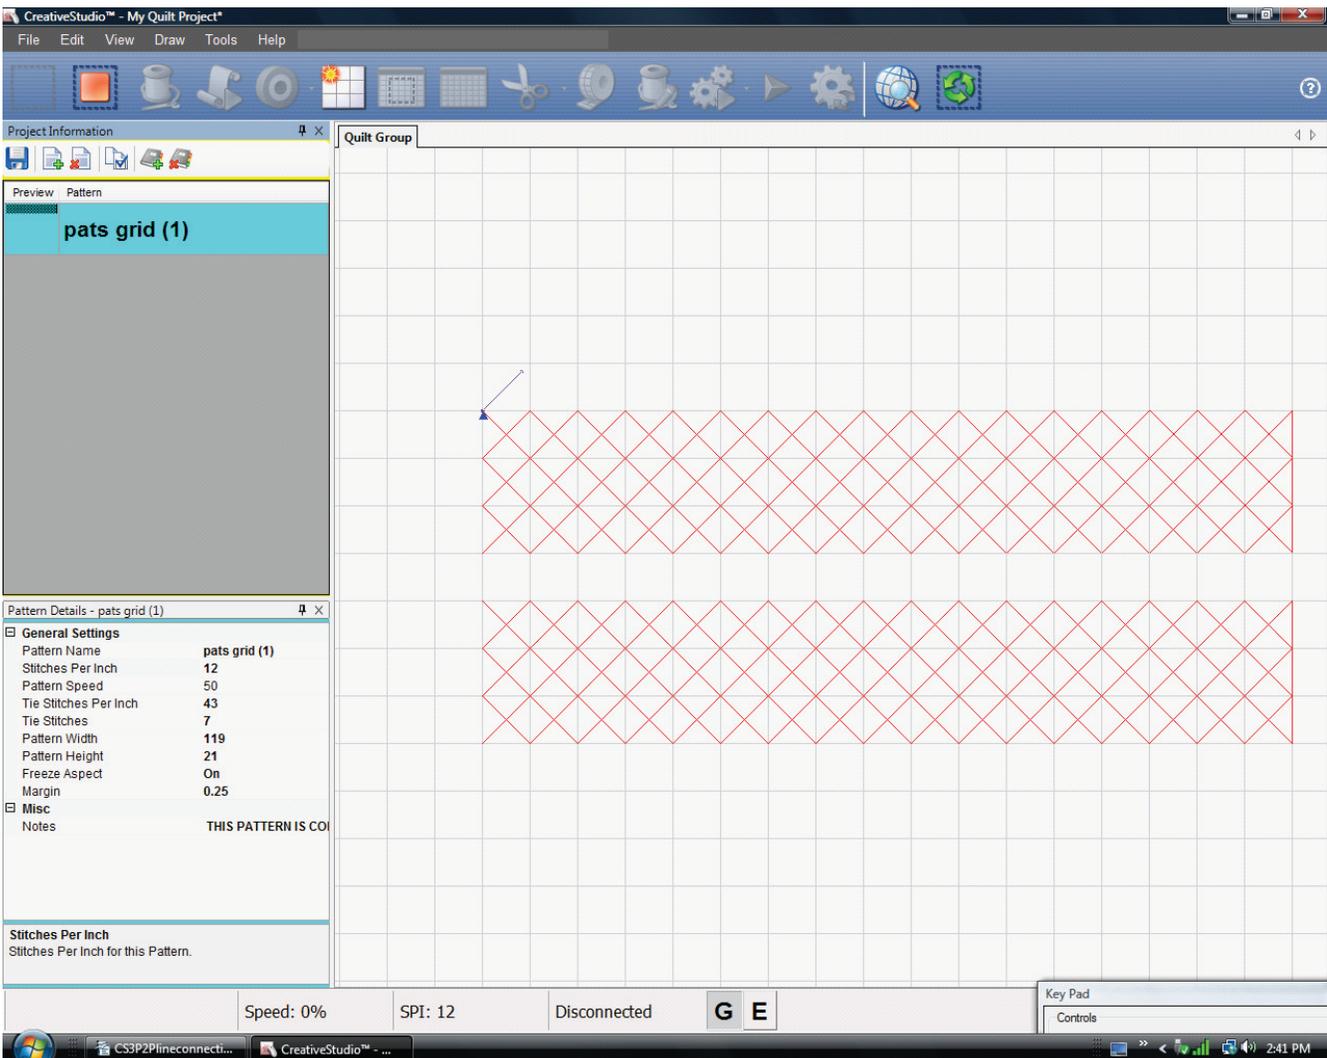

- Click on Repeat Pattern icon. With the freeze aspect function turned on, set height of your pattern. In this exercise the total height will be 21" (3 squares @ 7" each)

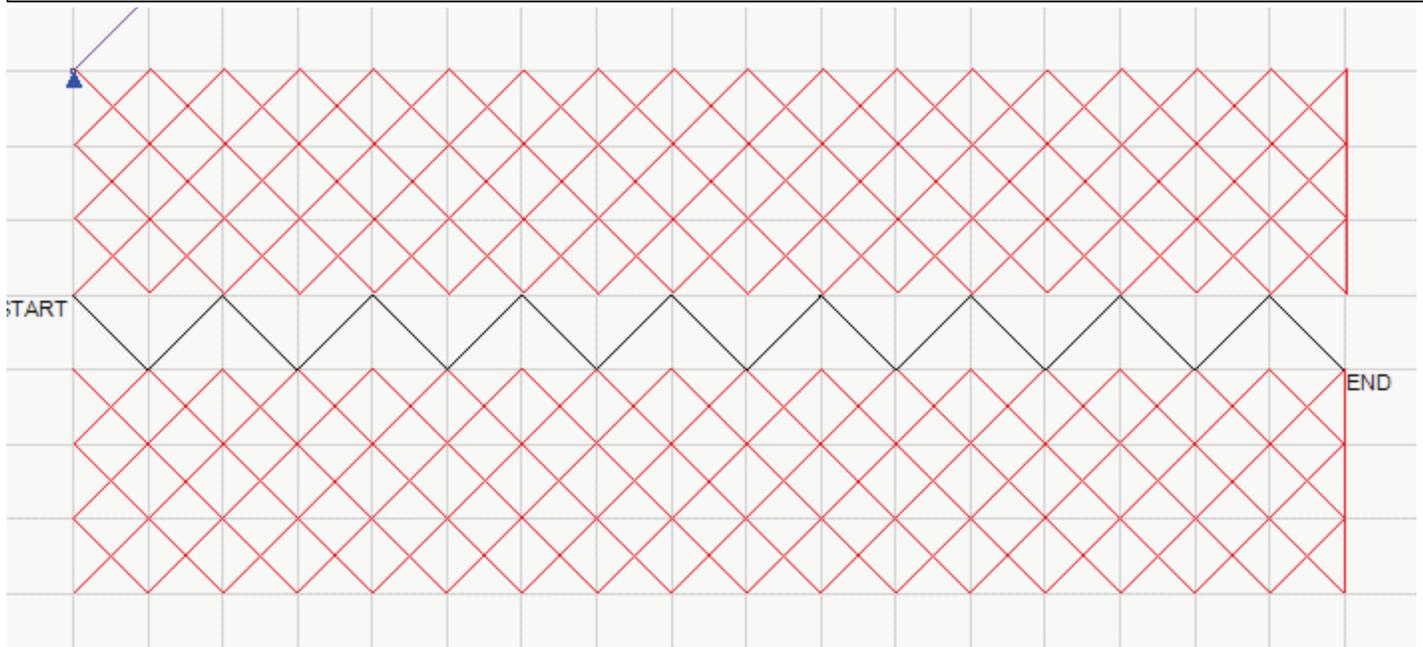

- Stitch out first pattern repeat.
- Roll quilt in preparation to quilt next pass. Move down and leave unquilted 7" (or the length of just one of the grids.)
- Quilt out second pattern repeat.
- Roll back to unquilted space.

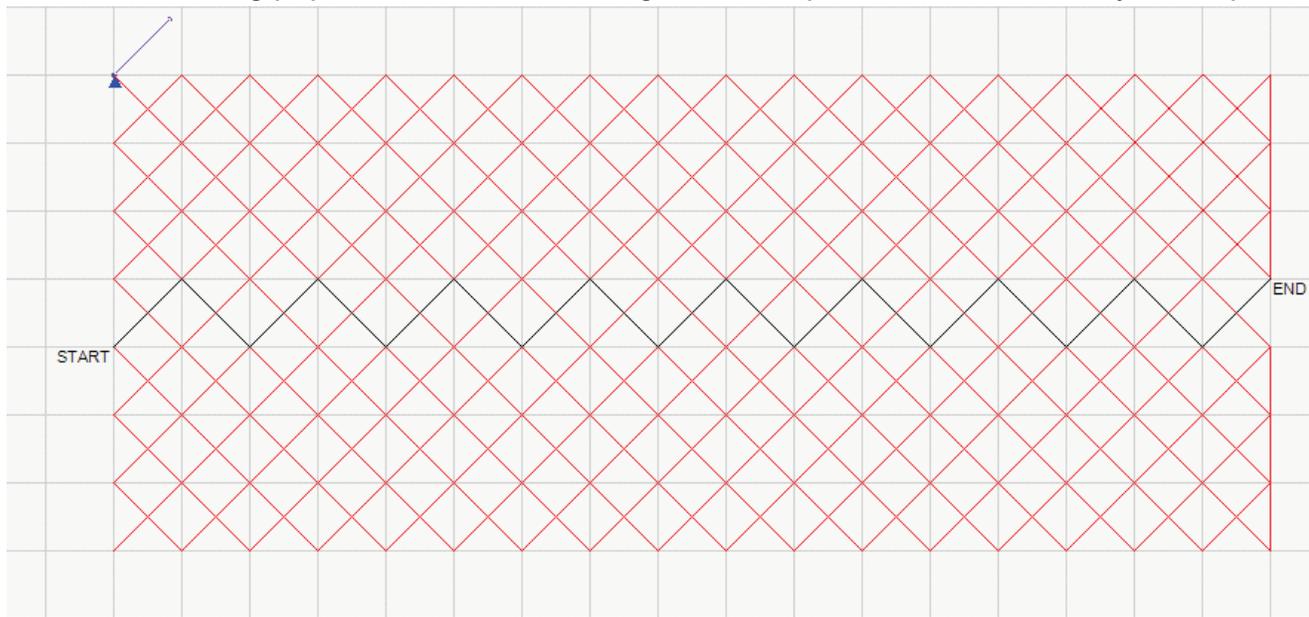

☐  Go to P2P icon. Select P2P line.

☐  Using P2P line, use head of machine to carefully draw lines from point above and below grid, working from left to right.

-  Click on Sew Icon and stitch out p2p lines.
-  Using p2p Line, draw in remaining lines and quilt. You are now ready to roll quilt.

-  Move down again, leaving 7" unquilted, repeat sewing out pattern and doing p2p line fill-in until quilt is completed.

---

**Question:** Why use p2p line to join rows of cross hatching?

**Answer:** It assists you in matching join points more accurately between rows.
