

Need to put all the patterns on the screen in place  
 The only pieces that have something under something are zen flower 1 and 2. They need to be stitched before zen leaf branch 1  
 The only piece that has multiple colored applique on top of the background is the zen chest 1 piece. You will stitch the background and quilting first then you will quilt the flower/leaves. At first pause, you will green leaves, then the flower background, then the flower petals and the flower petal quilting, then the flower center.  
 The zen toes/branch will sew the 4 toes first and then the branch.
